

ACR 112: HVAC Service Procedures

This course covers system performance checks and refrigerant cycle diagnosis. Emphasis is placed on the use of refrigerant recovery/recycle units, industry codes, refrigerant coils and correct methods of charging and recovering refrigerants. Upon completion, students should be able to properly recover/recycle refrigerants and demonstrate safe, correct service procedures which comply with the no-venting laws.

Credits: 3

Prerequisites:

Permission of instructor

Program: Air Conditioning and Refrigeration

Manipulative Laboratory: 6

Theory Credit: 1
