

CIS 276: Server Administration

This course introduces network operating system administration. Topics included in this course are network operating system software installation, administration, monitoring and maintenance, user, group, and computer account management; shared resource management; and server hardware management. Students gain hands-on experience in managing and maintaining a network operating system environment.

Credits: 3

Prerequisites: CIS 134, CIS 202, or CIS 263

Program: **Computer Information Systems**
