

DHY 120: Dental Materials

This course is designed to study the characteristics, manipulation, and application of dental materials ordinarily used in the dental office. Students are given intra and extra oral technical tasks to perform. Emphasis is placed on polishing amalgam restorations, and placement of sealants. Upon completion, students will be able to take and pour alginate impressions, trim study models, construct temporary crowns and mouth guards, polish amalgam restorations, place sealants, manipulate cements and impression materials.

Credits: 2

Prerequisites:

DHY 110

DHY 112

DHY 114

DHY 116

DHY 118

Co-Requisites:

DHY 122

DHY 124

DHY 126

DHY 128

Program: Dental Hygiene

Experimental Laboratory Credit: 1

Theory Credit: 1
