

MLT 111: Urinalysis

This course focuses on the theory and techniques in the examination of urine and other body fluids. The student is introduced to the physical and chemical properties of these fluids as well as microscopic examination of sediment and the identification of cells and crystals. Upon completion, students should be able to perform basic urinalysis and correlate laboratory results to renal disorders and other disease states. This is a CORE course.

Credits: 3

Prerequisites:

Admission to the Program

Program: Medical Laboratory Technology

Skills Laboratory/Clinical Practice: 2

Theory Credit: 2
