

MTT 138: Milling I Lab

This course provides basic knowledge of milling machines. Emphasis is placed on types of milling machines and their uses, cutting speed, feed calculations, and set-up procedures. Upon completion, students should be able to apply milling techniques to produce machine tool projects. This course is aligned with NIMS certification criteria.

Credits: 3

Prerequisites:

MTT 121, MTT 149 and MTT 150 or Permission of instructor

Program: Machine Tool Technology
