

MTT 243: CNC Turning Lab I

This course covers basic computer numeric control (CNC) turning machine set-up and operating procedures (inner diameter and outer diameter). Upon completion, the student should be able to load a CNC program and set-up and operate a CNC turning machine to produce a simple part. Related safety and inspection and process adjustment are also covered.

Credits: 3

Co-Requisites:

MTT 140

Program: Machine Tool Technology

Experimental Laboratory Credit: 6
