WKO 143: MSSC Manufacturing Process and Production Course

This course is designed to provide students with knowledge and skills related to manufacturing processes and production in a manufacturing environment. Topics covered include:

- · Identify customer needs
- · Determine resources available for the production process
- · Set up equipment for the production process
- · Set team production goals
- · Make job assignments
- · Coordinate work flow with team members and other work groups
- · Communicate production and material requirements and product specifications
- · Preform and monitor the process to make the product
- · Document product and process compliance with customer requirements
- · Prepare final product for shipping or distribution

Students completing this course will receive an MSSC certificate in manufacturing processes and production.
